cardiac consequences of malnutrition—Ancel Keys revisited! (editorial), 422
necessity of carnitine supplementation in semistarved rats fed a high-fat diet, 628
the patient with incurable aphagic cancer: to feed or not to feed? (editorial), 676
refeeding procedures after 43 days of total fasting, 100
the role of diet components, gastrointestinal factors, and muscle innervation on activation of protein synthesis in skeletal muscles following oral refeeding, 196

**Statistics**
clustered data (random bytes), 487
a conundrum in the analysis of change (random bytes), 360
how to explain an interaction (random bytes), 170

**Subjective Global Assessment (SGA)**
nutritional assessment in the elderly: facing up to the challenges of developing new tools for clinical assessment (editorial), 62

**Sulfhydryl Compounds**
glutathione—nutritional and pharmacologic viewpoints: part I, 428

**Sulfur**
glutathione—nutritional and pharmacologic viewpoints: part I, 428

**Superoxide Dismutase**
low dietary zinc alters indices of copper function and status in postmenopausal women, 701
reactive oxygen species in human health and disease (prospective overview to nutrition/metabolism classic), 161

**Support Groups.** *See* Self-Help Groups

**Surgical Procedures, Operative**
can posttraumatic insulin resistance be attenuated by prior glucose loading? (editorial), 354
cancer: impact of nutrition intervention outcome—nutrition issues for patients, 769
effect of carbohydrate feeding on insulin action in skeletal muscle after surgical trauma in the rat, 332
glucose infusion does not suppress increased lipolysis after abdominal surgery, 85
glutamine-supplemented total parenteral nutrition in major abdominal surgery, 969
influence of glutamine-enriched parenteral nutrition on nitrogen balance and immunologic status in patients undergoing elective aortic aneurysm repair (research letter), 475
oral dietary supplements before and after surgery (letter), 186

**Survival**
nutrition and survival in patients with liver cirrhosis, 445
predictors of survival in terminal-cancer patients with irreversible bowel obstruction receiving home parenteral nutrition, 581

**Swine**
porcine growth hormone: a central metabolic hormone involved in the regulation of adipose tissue growth, 789

**T-Lymphocytes**
parenteral supplementation with a fish-oil emulsion prolongs survival and improves rat lymphocyte function during sepsis, 112

**Taste**
how genes control real world intake: palatability–intake relationships (editorial), 266

**Tea**
investigation of commercial MitoLife as an antioxidant and antimutagen, 322

**Terminally Ill**
predictors of survival in terminal-cancer patients with irreversible bowel obstruction receiving home parenteral nutrition, 581

**Testosterone**
anorexia, sarcopenia, and aging, 660

**Tetrahydrofolates**
folate and chemoprevention of colorectal cancer: is 5-methyl-tetrahydrofolate an active antiproliferative agent in folate-treated colon-cancer cells (research letter), 652
folate homeostasis and antiproliferative activity of folates and antifolates (editorial), 737
is it worthwhile to try different coenzymatic forms of folate in future chemoprevention trials? (editorial), 738

**Thailand**
nutritional assessment in various stages of liver cirrhosis, 761

**Thiamine**
the importance of the refeeding syndrome, 632
severe metabolic acidosis and heart failure due to thiamine deficiency, 351

**Thioctic Acid**
molecular aspects of lipoic acid in the prevention of diabetes complications, 888

**Thiols.** *See* Sulfhydryl Compounds

**Third World Countries.** *See* Developing Countries

**Thymus Gland**
immunonutrition and the thymus (editorial), 972
nutrition disorders and immunologic parameters: study of the thymus in growing rats, 724
ω-3 polyunsaturated fatty acids and maize flour diets, 944

**Tin**
organ heavy-metal accumulation during parenteral nutrition is associated with pathologic abnormalities in rats, 600

**Tissue Donors**
effect of nutritional state of brain-dead organ donor on transplantation, 948

**Tocopherol.** *See* Vitamin E

**Tooth Erosion**
nutrition and dietary challenges in oral health, 426

**Tooth Loss**
compromised dental function and nutrition, 177

**Total Parenteral Nutrition.** *See* Parenteral Nutrition, Total

**Toxic Substances.** *See* Hazardous Substances

**Trace Elements.** *See also* specific trace elements
antiinflammatory effects of *Cordia myxa* fruit on experimentally induced colitis in rats, 391
effect of vitamin and trace-element supplementation on cognitive function in elderly subjects, 709

**Transforming Growth Factor-Beta**
more good news about fish oil (editorial), 158
parenteral supplementation with a fish-oil emulsion prolongs survival and improves rat lymphocyte function during sepsis, 112

**Transplantation**
effect of nutritional state of brain-dead organ donor on transplantation, 948
irreversible intestinal failure, nutrition support, and small bowel transplantation, 747
parenteral nutrition support after bone marrow transplantation: comparison of total and partial parenteral nutrition during the early posttransplantation period, 773
reduction in energy expenditure after liver transplantation, 585

**Triglycerides**
effects of conjugated linoleic acid on serum leptin concentration, body-fat accumulation, and β-oxidation of fatty acid in OLETF rats, 385
Intralipid 10%: physicochemical characterization, 930
small-intestine absorption during continuous intraduodenal infusion of nutrients in dogs, 254
ω-3 polyunsaturated fatty acids and maize flour diets, 944

**Tryptophan**
increased plasma tryptophan in HIV-infected patients treated with pharmacologic doses of nicotinamide, 654

**Tube Feeding.** *See* Enteral Nutrition

**Tumor Necrosis Factor-Alpha**
the brain–lipid–heart connection (editorial), 260
cancer anorexia and cachexia, 438
insulin: more lessons to be learned (editorial), 419
is insulin an antiinflammatory molecule?, 409
is obesity an inflammatory condition?, 953
metabolic and nutritional disorders in cardiac cachexia, 756
prevention of chemically induced diabetes mellitus in experimental animals by polyunsaturated fatty acids, 126

**Tumors.** *See* Neoplasms

**Tunisia**
changing infant-feeding practices and growth in Tunisian children (editorial), 681

**Twins**
heritability of diurnal changes in food intake in free-living humans, 713

**Ubiquinone**
role of vitamins in skin care, 839

**Ubiquitin**
cancer anorexia and cachexia, 438

**Uganda**
relation of vitamin A and carotenoid status to growth failure and mortality among Ugandan infants with human immunodeficiency virus, 567

**Ulcer.** *See* Decubitus Ulcer

**Ultrasonography**
growth failure and decreased ultrasound parameters of bone density in children with inflammatory bowel disease (letter), 83

**United Kingdom.** *See* Great Britain

**Urea**
role of essential amino acids in renal failure (nutrition/metabolism classic with prospective overview), 688

**Vascular Diseases**
molecular aspects of lipoic acid in the prevention of diabetes complications, 888

**Ventromedial Hypothalamic Nucleus**
is obesity an inflammatory condition?, 953

**Vitamin A**
the evolving role of carotenoids in human biochemistry, 818
relation of vitamin A and carotenoid status to growth failure and mortality among Ugandan infants with human immunodeficiency virus, 567
role of vitamins in skin care, 839

**Vitamin B12 Deficiency**
clinical pictures of malnutrition in ill elderly subjects, 496
vitamin B12 deficiency–need for a new guideline, 917

**Vitamin C.** *See* Ascorbic Acid

**Vitamin D**
low serum concentrations of 25-hydroxyvitamin D in young adult Japanese women: a cross sectional study, 921
role of vitamins in skin care, 839

**Vitamin E**
antioxidant mobilization in response to oxidative stress: a dynamic environmental–nutritional interaction, 828
does vitamin E protect against cognitive changes as we age?, 806
the genetic basis of vitamin E deficiency in humans, 797
micronutrients in women's health and immune function, 858
role of vitamin E and oxidative stress in exercise, 809
role of vitamins in skin care, 839
2001 assessment of nutritional influences on risk for cataract, 845
vitamin E and comparative wildlife nutrition, 904
vitamin E and $\omega$-3 fatty acids: effectors of platelet responsiveness, 793
vitamin E kinetics and the function of tocopherol regulatory proteins, 799

**Vitamin K**
Japanese fermented soybean food as the major determinant of the large geographic difference in circulating levels of vitamin K2: possible implications for hip-fracture risk, 315
vitamin K and bone health, 880, 1032 (erratum)

**Vitamins**
beyond deficiency: new roles for vitamins and other bioactive molecules—a memorial tribute to Lawrence J. Machlin, 787
effect of vitamin and trace-element supplementation on cognitive function in elderly subjects, 709
International Conference on Human Functioning, Wichita, Kansas, September 22–24, 2000, 508
micronutrients in women's health and immune function, 858
nutritional aspects of nitric oxide: human health implications and therapeutic opportunities, 896
nutritional factors in the pathobiology of human essential hypertension, 337
role of vitamins in skin care, 839
vitamin and mineral supplement use by healthy teenagers in Korea: motivating factors and dietary consequences, 373

**Wasting.** *See* Cachexia; HIV Wasting Syndrome; Muscular Atrophy

**Water.** *See* Body Water

**Weight Gain.** *See also* Body Weight; Obesity
reduction in energy expenditure after liver transplantation, 585

**Weight Lifting**
creatine and $\beta$-hydroxy-$\beta$-methylbutyrate (HMB) additively increase lean body mass and muscle strength during a weight-training program, 558

**Weight Loss.** *See also* Body Weight; Cachexia; HIV Wasting Syndrome
anorexia, sarcopenia, and aging, 660
beyond calories and fat grams: am I deserving of successful weight loss?, 362
glutamine-antioxidant supplementation increases body cell mass in AIDS patients with weight loss: a randomized, double-blind controlled trial, 206
insulin resistance in patients with cancer: relationships with tumor site, tumor stage, body-weight loss, acute-phase response, and energy expenditure, 590

**Whites**
ethnic differences in body-size preferences: myth or reality? (editorial), 353

**Wine**
how does the body deal with energy from alcohol? (editorial), 677
malondialdehyde modification of proteins in vitro is enhanced in the presence of acetaldehyde, 619

**Women**
calcium supplementation and iron status of females, 46
estimates of the effects of folic-acid fortification and folic-acid bioavailability for women, 873
ethnic differences in body-size preferences: myth or reality? (editorial), 353
Japanese fermented soybean food as the major determinant of the large geographic difference in circulating levels of vitamin K2: possible implications for hip-fracture risk, 315
low dietary zinc alters indices of copper function and status in postmenopausal women, 701
low serum concentrations of 25-hydroxyvitamin D in young adult Japanese women: a cross sectional study, 921
micronutrients in women's health and immune function, 858

**Wound Healing**
improving outcome of pressure ulcers with nutritional interventions: a review of the evidence, 121
nutritional intervention trials for preventing and treating pressure ulcer (editorial), 155

**Zeaxanthin**
the evolving role of carotenoids in human biochemistry, 818

**Zinc**
clinical pictures of malnutrition in ill elderly subjects, 496
discovery of human zinc deficiency: impact on human health (editorial), 685
effect of thickening agents, based on soluble dietary fiber, on the availability of calcium, iron, and zinc from infant formulas, 614
low dietary zinc alters indices of copper function and status in postmenopausal women, 701
nutritional care in renal disease patients (editorial), 157
recognition of zinc-deficiency syndrome (prospective overview to nutrition/metabolism classic), 67
zinc and copper: evidence for interdependence, not antagonism (editorial), 734
